Dr. Nimrod Friedman

The use of injections of dermal fillers has become the most popular aesthetic treatment among women in the world. Dr. Nimrod Friedman, one of the leading doctors in Israel in the field of plastic and aesthetic surgery, performs breast enlargement surgery, facelifts, tummy tucks, eyelid lifts etc. He is an expert in Botox treatments and dermal fillers for facial design. "In order

to receive natural results that integrate harmoniously with your facial structure, the doctor has to be very familiar with facial structure and the ageing process. Today, fillers allow us to sculpt the face, giving it a young, fresh and natural look. Therefore, even though the treatment looks simple and easy, it is important to perform it in the best, most experienced and most professional place possible, where only natural fillers that decrease the chances of complications, are used", he explains.

Dr. Nimrod Friedman, expert in plastic and aesthetic surgery, director of the clinic at 7 Haomanim St., Tel Aviv. Tel: 03-5626464. For details: www.drfriedman.co.il
